OPERATIONS SEQUENCE: RECOVERY

A recovery test south of Hawaii 26 February involved the dropping of two nosecones from a B-47, one for surface pick-up and one for air snatch.

was a passenger/observer in the C-119 ~~XXXXXXXXXX~~ air recovery plane, was an observer on the destroyer, and observed procedures on the ground at Hawaiian Control Center and Keana Point Tracking Station. Security procedures during this visit were found to be lax and both the Center and the 6593rd Test Squadron were jacked up on personnel badging and other security precautions.

Procedure for handling of capsule after retrieval was agreed by cable from to LMSD & PACC(BMD) that BMD shld have responsibility for capsule until delivered to West Coast facilities of LMSD. Proj Hqs wld then assume responsibility for delivering to processor / C. L. Murphy to BMD & LMSD.

Approved For Release 2005/04/22 : CIA-RDP85B00803R000100030079-5 from Murphy 3 Apr 59.
